

FOR ALL YOUR OUTDOOR
FLOOR LIGHTING NEEDS

LIGHT UP YOUR
PATHWAYS
PARKING LOTS
GARDEN
HOTELS & RESORTS
SWIMMING POOL
& MORE ...
WITH SOLAR ENERGY

CHARGES UP BY
HARNESSING SUNLIGHT
DURING THE DAY

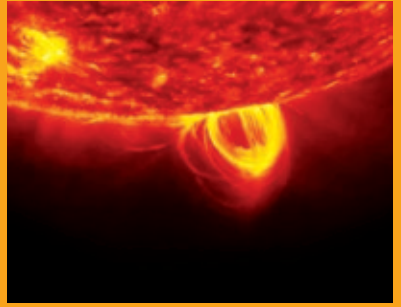

GLOWS UP DURING
THE NIGHT UNTIL
DAWN

DID YOU KNOW?

The sun can provide enough power within 2 minutes to meet the world's annual energy need. Solar power if used, can take care of all the electricity needs of the earth.

Amazing isn't it?

But, sadly we harness it enough to power only 2.8 % of world's electricity.

WHY NEED SOLAR?

Human activity is burdening our atmosphere with carbon emissions. This is resulting in intense climate change and extinction.

Usage of renewable sources of energy generates little or no harmful emissions. It not only decreases the cost of generating energy, but drastically reduces the pollution levels emitted by non-renewable sources of energy. Let us grow towards a safe and healthy environment and why not take help of renewable sources of energy to do the same?

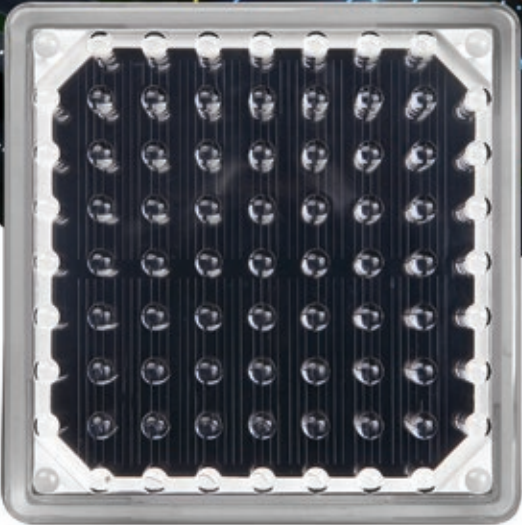

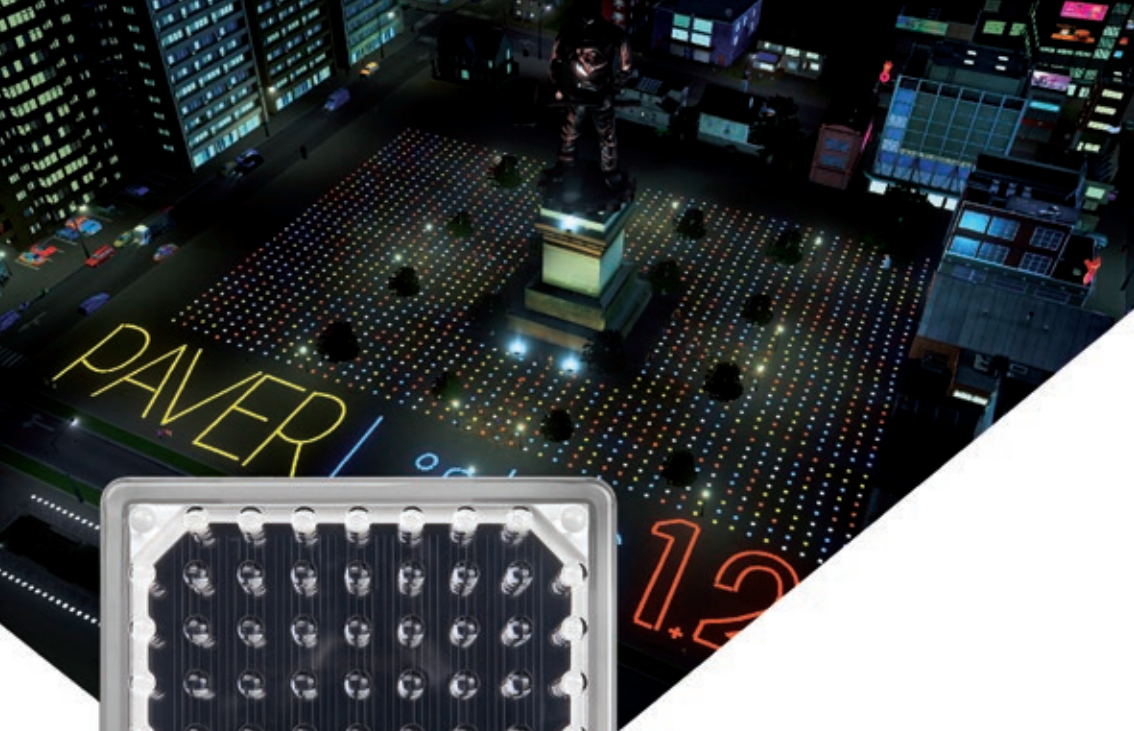

What use are these devices of, if they are not recyclable?

what do we do after the product has been used? We just throw it away. We should thank nature for its resources, by making sure to recycle the product at the end of its life.

We have always aimed at revolutionizing technology for the betterment of the environment and that's why our solar led brick light is recyclable. It is us who can save the world, by not only conserving energy but by recycling it too.

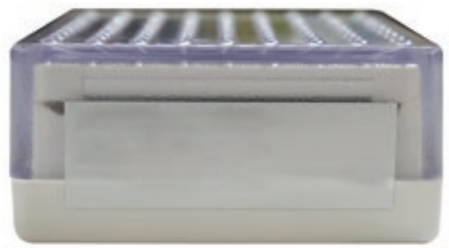

Let us build a stronger, cleaner and healthier environment together!

 **SWAAADLE**
SOLAR BRICKS
Harness the Gift of Nature!

Running on and taking advantage of the abundance of solar rays, our innovative product provides the power to illuminate your walkways, pathways, gardens beautifully. Boasting a capacity to withstand 2000 kgs of weight, power up your nearby landscapes with SWAAADLE SOLAR BRICK LIGHT.

**WATER & DUST
PROTECTION**
IP 68

**MADE OF
POLYCARBONATE**
Can withstand upto
2000 kgs of wieght

**LUMINOUS
FLUX**
0.55 lm

**AUTO
ON / OFF**

DIMENSION
100x100x47mm

**INBUILT
BATTERY**
2200 mah

Power Rating
0.5W

Life Span
≥50000 Hours

Working Temperature
-10°C ~ +45°C

Full Charging Period of
Battery 6-9 hours
(daytime)

Discharge Period of Battery
≥18 hours

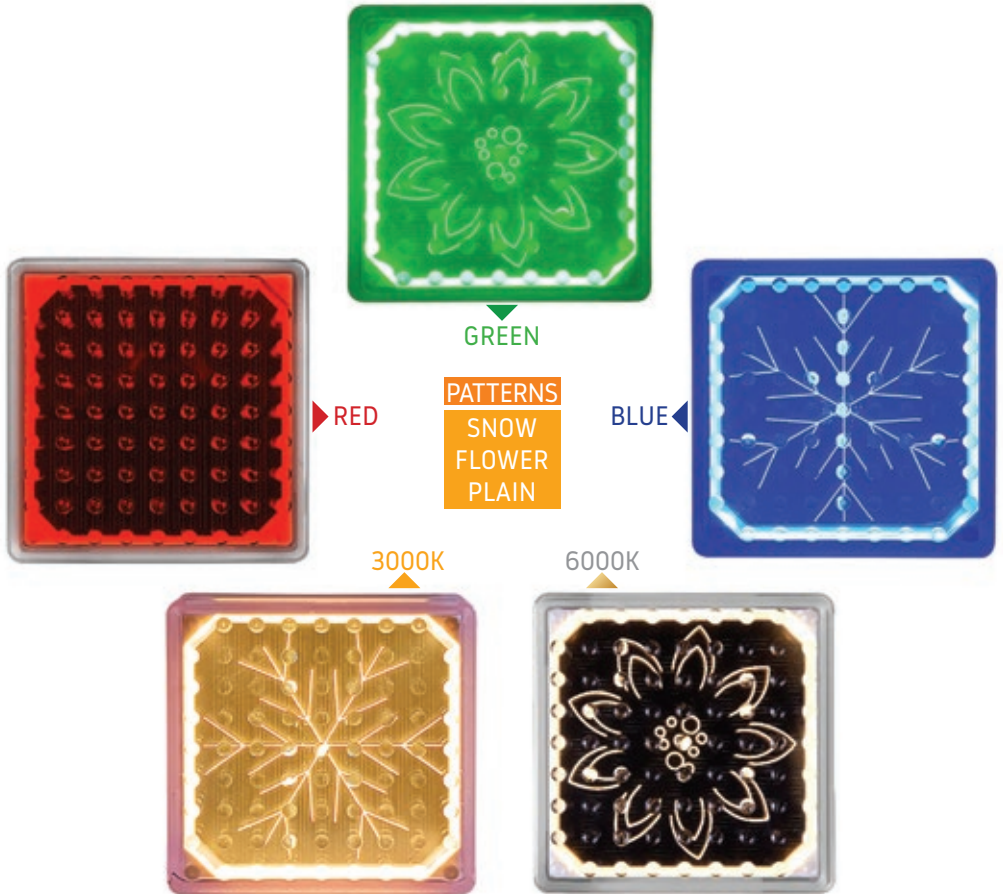

■ Solar Energy, safe and
■ environmental friendly.

■ Customizable
■ surface pattern.

■ Free drive design, easy
■ installation & maintenance.

■ Suitable for surfaces with direct
■ sunlight, like square, landscape,
■ garden etc.

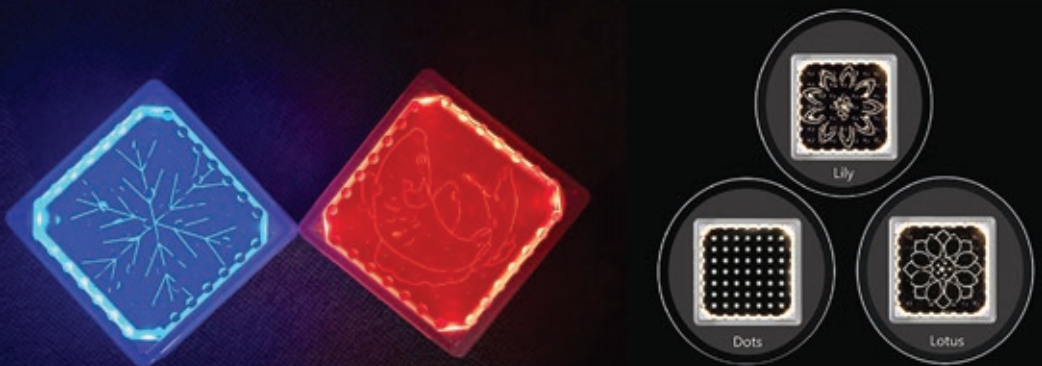

COLOURS & DESIGN

- **Walk over it? Run a truck over it?** Kids jumping over it? Not to worry at all, it can withstand weight upto 2000 kgs of weight!
- **Works even in the harshest climate.** Takes on the rainy season with ease as it boasts IP68 water proof level.
- **Glows up your pathway** without causing any burden on electricity bills. Enjoy free illumination of your pathway!
- **Simple and easy to install.** No wiring required and works like magic.

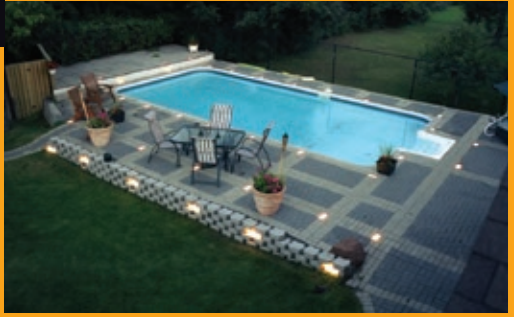

LOGO CUSTOMIZATION

Choose from a wide range of pre-patterned designs or you can create your own designs. Yes, we customize Solar Brick Lights according to your needs & specifications. Elevate your brand presence by engraving your brand logos in Solar BRICK Lights.

HOW TO INSTALL

FAQ ON SWAAADLE SOLAR BRICK LIGHTS

1. Do these Solar Bricks produce power when the sun isn't shining?

- Yes, if it is fully charged, it can light up to 12-20 hours.
- If light is below 200 lux Solar Bricks will turn on automatically and when over 200 lux it will turn off and charge automatically.
- Solar Brick Light can also charge during overcast day (because of the ultraviolet rays), but it needs 16 hours to be fully charged.

2. How many hours of sunlight does it need to be fully charged?

- A minimum of 6-9 hours.

3. How many hours it will illuminate from one charge?

- It will illuminate up to 12-20 hours.

4. Will it work even if it is submerged in water for more than 10 hours?

- Yes, it is IP68, it can work even if it's submerged in water for more than 10 hours.

5. What is the warranty period for the product?

- 2 years.

6. Do these come in different sizes?

- Yes, can be customized to this size: 250x130x60mm. The standard size being: 100x100x47mm.

7. How long does it take to install and replace them?

- It is easy to install. Takes about half an hour of your time.

8. Do they come with in-built batteries?

- Yes, the in-built battery system is that of a lithium one.

9. How often do we need to replace the batteries?

- Average would be 3-5 years, it provides you energy around 50,000 hours.

10. If laid in the parking lot, are these strong enough to be run over by a car or truck?

- The load capacity of the solar brick light is 2000kgs per point pressure, so a car or truck can easily drive over it.

Unwrapping Innovations

OUR BEGINNING

Big journey begins with small steps...

All around the world millions of innovations are changing the way people live but our gut feel says why can't we have access to such uber products that have revolutionised living?

WHAT WE DO?

We at swaaadle tech invent & design products that will change a person's lifestyle from "Just living" to "Smart Living". We have always aimed at revolutionising technology for the betterment of the healthy environment and it's ecosystem.

our innovations are focussed towards conserving natural resources for the current and future generation. We want to create an ecosystem such that we utilise the renewable energy sources to the fullest for safe and pollution free environment.

OUR IDEOLOGY

We want to build a stronger, cleaner and healthier environment together !

OUR VISION

We strive to take steps to maintain a fruitful bond with our customers; we put our customers first and try to build long-term trust.
